INFINITY INGREDIENTS

Decorative

In today's high-def, flawless skin isn't just a desire; it's a full-blown expectation. From "pixel-perfect" finishes to flawless complexions, decorative cosmetics are stepping up in a big way, and consumers are demanding more from every swipe, dab, and blend.

It's no longer just about covering imperfections like blemishes (see Problematic Skin leaflet), dark circles, or puffy eyes (see Eye Care leaflet); it's about enhancing features while delivering real skin benefits. And that's where you, the formulator, get to shine.

At Infinity Ingredients, we've got the actives and functional decorative ingredients you need to create high-performance makeup that goes beyond beauty. Think:

Foundations with anti-ageing benefits

Lipsticks that plump and hydrate

Mascaras that lengthen, thicken, and nourish lashes

Primers and concealers that smooth, brighten, de-puff, and blur.

We also know skincare-makeup hybrids are booming. Products like BB and CC creams, tinted serums, and treatment-infused foundations are blurring the lines between makeup and skincare, because consumers want multitaskers that make their routines quicker and smarter.

And let's not forget about long-wear and waterproof formulas. As transfer-resistant makeup grows, your formulations need film-formers, texturising agents, and makeup removers that hold up to humidity, movement, and occasional tears without sacrificing comfort or wearability. Not to mention effective makeup removers for the end of the day.

So, whether you're working on the next best blurring primer, hydrating concealer, or high-impact colour product with added skincare benefits, we're here to help you create makeup that looks good and does good.

While most Laminaria live for only three years, the Queen survives for 10-30. It is the only seaweed that completely regenerates its blade every spring; as a new blade develops underneath, the old one sheds in the spring/ early summer therefore keeping the plant's metabolic activity high year-round. This organic alga grows in Brittany (France) and the extraction process uses Sustainable Palm Oil (RSPO) Mass Balance grade.

BOREALG TG is a liposoluble active ingredient composed of a pool of lipidic and antioxidant molecules (such as fucosterol) coming from the leathery kelp of the brown seaweed, Laminaria hyperborea. BOREALG re-stimulates the epidermal turnover rate that tends slow as we age. BOREALG TG re-activates the skin's natural regeneration process and reduces redness thanks to a synergistic action on mitochondrial activity, leptin receptors, Fatty-Acid-Binding Protein 3 (FABP3) as well as Cyclin D1 (CCN D1).

BOREALG TG noticeably improves skin appearance and accelerates wound healing. Its soothing properties make it ideal for post-treatment care, such as recovery after peels, laser or tattoos, irritated skin to calm redness, dryness, and discomfort from sunburn or sensitivity and for barrier protection as BOREALG TG It significantly reduces TEWL therefore reinforcing the skin's barrier against daily aggressions.

Hydra-T

(INCI: Tremella fuciformis polysaccharide)

Native to China, the Tremella fuciformis is also known as the “snow mushroom” is considered a gift from nature. With its translucent colour and gelatinous texture, it is traditionally used in Chinese medicine to refine women’s beauty. HYDRA-T is 100% natural and Cosmos compliant.

It contains a low molecular weight natural hyaluronic acid, which can penetrate deeply into the skin. As we all know, Hyaluronic acid is a compound naturally present in the dermis that acts as a molecular sponge, where it is able to fix up to 1000 times its weight in water. Its function is to ensure the hydration of the skin, whilst helping form the connective tissue of the dermis to support collagen and elastin fibres.

It plays a fundamental role in the density and tone of the skin, but over the years, the production of hyaluronic acid by the body tends to decrease (a decline of around 6% per decade), which causes the appearance of the first wrinkles and fine lines on the surface of the epidermis. It is therefore advantageous to incorporate active ingredients rich in hyaluronic acid, such as Tremella fuciformis to the dermis as part of an anti-ageing strategy.

HYDRA-T is rich in polysaccharides and protects the skin whilst improving the impermeability of the skin barrier. Easy to formulate and does not induce a tightening effect on the skin. Ideal for use in anti-ageing cream, body care, decorative cosmetics and hair care.
